Linde

Order Picker

N20 LoL

Capacity 0.8 t | Series 1115

Practical double order picker

- Long load arms and additional liftable forks allow two pallets to be loaded at a back-friendly height, one after the other, in just one picking cycle
- Fully suspended operating platform provides optimum protection against shocks and vibrations while driving
- Operator's platform in front of the battery ensures maximum maneuverability and a clear view of the warehouse environment
- Robust cast-steel bumper protects chassis and operator's compartment from damage

CHARACTERISTICS

Linde BlueSpot™ and front LED light

Safety

- Automatic speed reduction in curves and increased braking performance in heavy loads offer maximum safety
- Regulated lowering to the load arms to allow soft landing of the load
- Automatic stop if the vehicle registers an unoccupied driver's platform or the emergency button is activated
- The driver's platform is positioned in front of the battery, giving him an optimum all-round view of the warehouse environment
- Additional options such as front LED and Linde BlueSpot™ maximize safety in the warehouse

Easy-to-use pallet locking

Ergonomics

- Liftable forks place pallet at optimum height, thus reducing physical strain on the operator
- Low access on both sides, 137 mm high, ensures quick boarding and alighting
- For short distances, the operator can conveniently control the vehicle from both sides using the optional pedestrian function.
- Optional pallet locking device ensures safe transport and easy release of the second pallet
- Fully suspended operator's compartment reduces vibrations and shocks transmitted to steering wheel and platform

Intuitive Linde steering wheel

Handling

- 3 kW three-phase AC motor for effective acceleration to a top speed of 12 km/h
- Depending on application requirements lead-acid or optionally lithium-ion batteries are available
- Adjustable Linde Steering wheel provides intuitive operation with meaningful symbols indicating the key vehicle functions
- Electric steering centering with sensors on the ground ensures reliability on transport routes
- Initial lift facilitates transport over ramps and uneven surfaces

Front casted steel bumper

Service

- Up to 1000 operating hours without service check
- Maintenance-free three-phase AC technology and adjustment-free brakes reduce service costs
- Engine and battery cover can be easily opened for access to the technical compartment
- Essential vehicle parameters can be read out via CAN bus connection via laptop
- Robust cast-steel bumper protects vehicle frame and operating platform to reduce collision damage

Subject to modification in the interest of progress. Illustrations and technical details could include options and not binding for actual constructions. All dimensions subject to usual tolerances.
